Email: parth.rawat@iiitb.ac.in
Mob.: +91-7049946162

Computer Science undergraduate with strong interests in AI Systems, Retrieval-Augmented Generation (RAG) and Backend Development. Experienced in building end-to-end AI applications using FastAPI, React, Vector Embedding, FAISS, Sentence Transformers, OCR, and Large Language Models.

Education

2022-2026

B.TECH. IN CSE

Medicaps University
CGPA : 3.2/4

2022

12TH (MPBSE)

HCM School, Sirali
Percentage: 90.40%

2020

10TH (MPBSE)

HCM School, Sirali
Percentage: 98%

Skills

PROGRAMMING LANGUAGES

Python, JavaScript, TypeScript

FRAMEWORK

Node.js, FastAPI, React

AI/ML

RAG, FAISS, Transformers, Vector
Embedding

DATABASES

MySQL, MongoDB

TOOLS

GitHub, Docker, Postman

SOFT SKILLS

Adaptability, Problem Solver,
Communication, Management

Coursework

- Data Structures and Algorithms
- Object Oriented Programming
- Data Analytics
- Restful API Design
- Operating System and Database Management
- Artificial Intelligence and Machine Learning
- Computer Networks

Projects

MediChar - RAG-based ICD-10 Medical Coding Assistant

GitHub: <https://github.com/ParthRawat1302/Medical-Coding-Explanation-Bot>

- Developed a Retrieval-Augmented (RAG) medical coding assistant that predicts ICD-10 diagnosis codes from clinical notes using semantic retrieval and LLM reasoning.
- Built a semantic retrieval pipeline using Sentence Transformers and FAISS over the MIMIC-IV ICD-10 knowledge base to generate clinically relevant diagnosis candidates.
- Designed a dual-mode OCR pipeline using Windows OCR, TrOCR, and OpenCV with a review-before-predict workflow to reduce OCR propagation errors.
- Implemented LLM-assisted candidate prioritization with local heuristic fallback, producing explainable primary and secondary ICD recommendations.

FastAPI, Uvicorn, Streamlit, Embeddings, Sentence Transformers, Vector Search, FAISS, OCR, Transformers

Insights – Smart Analytical Platform

GitHub: <https://github.com/ParthRawat1302/Insights>

CODE

- Built a production-ready analytics platform with a FastAPI backend and a thin React frontend.
- UI dynamically renders dashboards, charts, KPIs and insights entirely from backend APIs.
- Implemented JWT authentication, async dataset processing and real-time status polling.

FastAPI, REST API Design, React, TypeScript, Vite, JWT Authentication

CHITRA - AI Image Generator

GitHub: <https://github.com/ParthRawat1302/CHITRA-AI-IMAGE-GENERATOR>

CODE

- Built a full-stack web app for real-time AI image generation using Stable Diffusion.
- Added Google OAuth login, interactive UI, and image history/download features.
- Used SSE for real-time generation; integrated Node.js, Flask and MongoDB.

HTML, CSS, JavaScript, NodeJS, Flask, MongoDB, SSE, Google OAuth, Stable Diffusion

Personal Website

Live: <https://parthrawat1302.github.io/personal-website>

CODE

- Developed a responsive personal portfolio website showcasing skills, projects and certifications.
- Integrated resume download, GitHub/LinkedIn links, and a real-time contact form with email delivery.

ReactJS, NodeJS, TailwindCSS

Certifications

Jun-2025 Alteryx Designer - Internship

CERT

- Completed a comprehensive in-house internship on Alteryx Designer (09 Jun - 04 Jul, 2025).
- Gained hands-on experience in data preparation, cleansing, transformation and blending.
- Built workflow automation, basic predictive analytics and reporting on real-world case studies.

Data Preparation, Cleansing, Transformation, Blending, Workflow Automation, Reporting

May-2026 AI LLM Developer - HCLTech

CERT

- Completed a 240-hour certification program on AI LLM Development (AI & Data) conducted by HCLTech, Jan'26-May'26.
- Certified by Ambika Natarajan, SVP & Head, Product Innovation & Solutions, HCLTech.

Extra-Curricular Activities

- Participated in Chess and Cricket competitions in college.
- Came 3rd in Escape room challenge
